BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 41

Accumulation voltammetry
Accumulation voltammetry of avidin and biotin using a biotin labeled with Nile Blue A (Sugawara et al.) 167
Aluminum
Piezoelectricity in the human pineal gland (Lang et al.) 191
Amide bound states
On the possibility of the creation of bound states of two amide-I quanta in α-helix (Kapor et al.) 93
Amine oxidase
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173
Amperometric determination
Amperometric determination of superoxide anions generated from a single phagocyte with femto-ampere sensitivity (Tanaka et al.) 201
Amperometric titration
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221
Amplitude factor
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Anaesthetic action
The geometric curvature of microtubules may play a part in information processing (Clark) 59
Aqueous pore model
Theory of electroporation: A review (Weaver, Chizmadzhev) 135
Ascorbic acid
On the origin of the differences between stearic-acid-modified carbon paste electrode performances after exposure to surfactant and brain tissues (Petit et al.) 101
Assembly
From stochastic to coherent assembly of microtubules: models and new results (Bolterauer et al.) 71
Avidin
Accumulation voltammetry of avidin and biotin using a biotin labeled with Nile Blue A (Sugawara et al.) 167
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221

Bilayer lipid membranes
Dynamics of formation and dissipation of local pH gradients in the unstirred layers near bilayer lipid membranes (Dzekunov, Antonenko) 187
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221
Biological transport
On the relevance of self-trapping as the mechanism for charge and energy transfer in biological systems (Ivić et al.) 43
Biotin
Accumulation voltammetry of avidin and biotin using a biotin labeled with Nile Blue A (Sugawara et al.) 167
Bipolaron formation
On the possibility of the creation of bound states of two amide-I quanta in α-helix (Kapor et al.) 93
Bose–Einstein condensation
Quantum mechanical concepts of coherent states in biological systems (Wu) 19

Calcification
Piezoelectricity in the human pineal gland (Lang et al.) 191
Calcium oscillations
Induced calcium oscillations in erythrocyte suspensions (Schramek, Glaser) 97
Carbon nanotube electrode
Carbon nanotube electrode for oxidation of dopamine (Britto et al.) 121
Ca^{2+} signal
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3
Cationic polypeptides
Modification of electrofusion by proteins (Xiao et al.) 161
Cell-free system
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
Cell interaction
Quantum mechanics: a breakthrough into biological system dynamics (Costato et al.) 27
Cell mediated immunity
Study of the interaction forces in human CD_4Ly (Jandová et al.) 181
Cellular automata
Cellular automata simulation of the effects induced by an external electromagnetic field on microtubule formation dynamics (Casati et al.) 63
Charge transfer
On the relevance of self-trapping as the mechanism for charge and energy transfer in biological systems (Ivić et al.) 43
Chemiluminescence
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Coherent states
Quantum mechanical concepts of coherent states in biological systems (Wu) 19

The production of Frohlich and Bose–Einstein coherent states in in vitro paracrystalline oligomers using phase control laser interferometry (Amoroso) 39
Collective excitations
Simple model of intermembrane communication by means of collective excitations modified by an electric field (Wojtczak, Romanowski) 47
Colour imaging technique
Organisms as polyphasic liquid crystals (Ho et al.) 81
Copper proteins
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173
Crystals
Piezoelectricity in the human pineal gland (Lang et al.) 191
Cyclic voltammetry
On the origin of the differences between stearic-acid-modified carbon paste electrode performances after exposure to surfactant and brain tissues (Petit et al.) 101
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Cypridina luciferin analogues
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Cytochrome c
Electrochemical identification of intermediate forms of urea denaturation of horse heart cytochrome c (Zhu, Dong) 107
Cytoskeleton
The geometric curvature of microtubules may play a part in information processing (Clark) 59
Cellular automata simulation of the effects induced by an external electromagnetic field on microtubule formation dynamics (Casati et al.) 63

Davydov model
On the possibility of the creation of bound states of two amide-I quanta in α-helix (Kapor et al.) 93
Denaturation
Electrochemical identification of intermediate forms of urea denaturation of horse heart cytochrome c (Zhu, Dong) 107
Differential pulse polarography
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173
Dopamine
On the origin of the differences between stearic-acid-modified carbon paste electrode performances after exposure to surfactant and brain tissues (Petit et al.) 101
Carbon nanotube electrode for oxidation of dopamine (Britto et al.) 121
Dynamic instability
From stochastic to coherent assembly of microtubules: models and new results (Bolterauer et al.) 71

Electroactive disulphide bonds
Predicting the number of electroactive disulphide bonds in proteins adsorbed on mercury electrodes (Honeychurch, Ridd) 115
Electrochemistry
Electrochemical identification of intermediate forms of urea denaturation of horse heart cytochrome c (Zhu, Dong) 107
Electromagnetic field generated by cells
Study of the interaction forces in human CD_4Ly (Jandová et al.) 181
Electromagnetic fields
Measurement system for experimental verification of Fröhlich electromagnetic field (Jelínek et al.) 35
Piezoelectricity in the human pineal gland (Lang et al.) 191
Electromagnetic stimulation
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
Electron transfer reaction
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Electropermeabilization
Theory of electroporation: A review (Weaver, Chizmadzhev) 135
Electroporation
Theory of electroporation: A review (Weaver, Chizmadzhev) 135
Electroporative stimulation
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Electrostriction
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221
Endogenous d.c. and a.c. fields
Microtubules in interactions with endogenous d.c. and a.c. fields in living cells (Satarić et al.) 53
Energy transfer
On the relevance of self-trapping as the mechanism for charge and energy transfer in biological systems (Ivić et al.) 43
Enzymatic degradation
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
Enzyme function
Voltammetric evidence of interfacial interactions between folates and thiols (Prokopová, Heyrovský) 209
Erythrocyte
Induced calcium oscillations in erythrocyte suspensions (Schramek, Glaser) 97
Exonuclease III activity
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
External electric field
Simple model of intermembrane communication by means of collective excitations modified by an electric field (Wojtczak, Romanowski) 47

Feedback loops
Topology of mutual relationships implicit in the Fröhlich model (Šrobár, Pokorný) 31
Fokker–Planck equation
From stochastic to coherent assembly of microtubules: models and new results (Bolterauer et al.) 71
Folates
Voltammetric evidence of interfacial interactions between folates and thiols (Prokopová, Heyrovský) 209
Fröhlich coherent states
Study of the interaction forces in human CD_4Ly (Jandová et al.) 181
Fröhlich model
Quantum mechanical concepts of coherent states in biological systems (Wu) 19
Topology of mutual relationships implicit in the Fröhlich model (Šrobár, Pokorný) 31
Measurement system for experimental verification of Fröhlich electromagnetic field (Jelínek et al.) 35

Glucose oxidase
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221

Helmholtz coils
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
HL-60
Amperometric determination of superoxide anions generated from a single phagocyte with femto-ampere sensitivity (Tanaka et al.) 201
Human lymphoma cells
Modification of electrofusion by proteins (Xiao et al.) 161
Hyperpolarization
Induced calcium oscillations in erythrocyte suspensions (Schramek, Glaser) 97

Interactions
Microtubules in interactions with endogenous d.c. and a.c. fields in living cells (Satarić et al.) 53
Intercellular communication
Quantum mechanics: a breakthrough into biological system dynamics (Costato et al.) 27
Interleukin 10
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Intermediate forms
Electrochemical identification of intermediate forms of urea denaturation of horse heart cytochrome c (Zhu, Dong) 107
Intermembrane communication
Simple model of intermembrane communication by means of collective excitations modified by an electric field (Wojtczak, Romanowski) 47
Ion permeation
Electrical conductivity and ion permeation in planar lipid membranes (Bordi et al.) 197
Isoelectric point
Modification of electrofusion by proteins (Xiao et al.) 161

Josephson junctions
Quantum mechanics: a breakthrough into biological system dynamics (Costato et al.) 27

Laser interferometry
The production of Frohlich and Bose–Einstein coherent states in in vitro paracrystalline oligomers using phase control laser interferometry (Amoroso) 39
Leucocyte adherence inhibition
Study of the interaction forces in human CD_4Ly (Jandová et al.) 181
Lipid bilayer membranes
Theory of electroporation: A review (Weaver, Chizmadzhev) 135
Living cells
Microtubules in interactions with endogenous d.c. and a.c. fields in living cells (Satarić et al.) 53

MCLA
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Membrane interaction
Modification of electrofusion by proteins (Xiao et al.) 161
Membrane resistance
Electrical conductivity and ion permeation in planar lipid membranes (Bordi et al.) 197
Mercury electrodes
Predicting the number of electroactive disulphide bonds in proteins adsorbed on mercury electrodes (Honeychurch, Ridd) 115
Microtubule formation dynamics
Cellular automata simulation of the effects induced by an external electromagnetic field on microtubule formation dynamics (Casati et al.) 63
Microtubules
Microtubules in interactions with endogenous d.c. and a.c. fields in living cells (Satarić et al.) 53
The geometric curvature of microtubules may play a part in information processing (Clark) 59
From stochastic to coherent assembly of microtubules: models and new results (Bolterauer et al.) 71
Microwave irradiation
Quantum mechanical concepts of coherent states in biological systems (Wu) 19
Model
Simple model of intermembrane communication by means of collective excitations modified by an electric field (Wojtczak, Romanowski) 47
Modelling
Induced calcium oscillations in erythrocyte suspensions (Schramek, Glaser) 97
Modelling approaches
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3
Modified electrofusion
Modification of electrofusion by proteins (Xiao et al.) 161
Monocytic cell
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Myoglobin
The effect of oxygen on the electrochemical behavior of myoglobin (Chou et al.) 217

Nigericin
Dynamics of formation and dissipation of local pH gradients in the unstirred layers near bilayer lipid membranes (Dzekunov, Antonenko) 187
Non-linear kinetics
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3
Non-thermal effects
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3

Organisms
Organisms as polyphasic liquid crystals (Ho et al.) 81
Oxidation
Carbon nanotube electrode for oxidation of dopamine (Britto et al.) 121
Oxygen
The effect of oxygen on the electrochemical behavior of myoglobin (Chou et al.) 217

Paracrystalline oligomers
The production of Frohlich and Bose–Einstein coherent states in in vitro paracrystalline oligomers using phase control laser interferometry (Amoroso) 39
Patch-clamp
Electrical conductivity and ion permeation in planar lipid membranes (Bordi et al.) 197
Pea
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173
Perturbation calculations
Quantum mechanical concepts of coherent states in biological systems (Wu) 19
Phagocyte activation
Amperometric determination of superoxide anions generated from a single phagocyte with femto-ampere sensitivity (Tanaka et al.) 201

Phonon coherent state
On the possibility of the creation of bound states of two amide-I quanta in α-helix (Kapor et al.) 93
pH gradients
Dynamics of formation and dissipation of local pH gradients in the unstirred layers near bilayer lipid membranes (Dzekunov, Antonenko) 187
pH-shift
Induced calcium oscillations in erythrocyte suspensions (Schramek, Glaser) 97
Planar membranes
Electrical conductivity and ion permeation in planar lipid membranes (Bordi et al.) 197
Plant protoplasts
Modification of electrofusion by proteins (Xiao et al.) 161
Plasmid DNA
Cell-free electrostimulation of exonuclease III degradation of DNA (Velizarov et al.) 213
Polarons
On the relevance of self-trapping as the mechanism for charge and energy transfer in biological systems (Ivić et al.) 43
Polypeptide
On the possibility of the creation of bound states of two amide-I quanta in α-helix (Kapor et al.) 93
Polyphasic liquid crystals
Organisms as polyphasic liquid crystals (Ho et al.) 81
Ponderomotive force
Cellular automata simulation of the effects induced by an external electromagnetic field on microtubule formation dynamics (Casati et al.) 63
Positive window
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Primary physical mechanisms
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3
Proteins
Predicting the number of electroactive disulphide bonds in proteins adsorbed on mercury electrodes (Honeychurch, Ridd) 115
Modification of electrofusion by proteins (Xiao et al.) 161
Protein secondary structure variation
Conformational study of some milk proteins. Comparison of the results of electronic circular dichroism and vibrational circular dichroism (Urbanová et al.) 77

Quinoproteins
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173

Resealing time
Modification of electrofusion by proteins (Xiao et al.) 161

Scanning electron microscopy (SEM)
Piezoelectricity in the human pineal gland (Lang et al.) 191
Secondary biological steps
External signals and internal oscillation dynamics: biophysical aspects and modelling approaches for interactions of weak electromagnetic fields at the cellular level (Kaiser) 3
Second harmonic generation (SHG)
Piezoelectricity in the human pineal gland (Lang et al.) 191
Signal flow
Topology of mutual relationships implicit in the Fröhlich model (Šrobár, Pokorný) 31
Single cell measurements
Amperometric determination of superoxide anions generated from a single phagocyte with femto-ampere sensitivity (Tanaka et al.) 201
Solid support
Immobilization of enzymes on lipid bilayers on a metal support allows study of the biophysical mechanisms of enzymatic reactions (Hianik et al.) 221
Solitons
On the relevance of self-trapping as the mechanism for charge and energy transfer in biological systems (Ivić et al.) 43
Stearic-acid-modified carbon paste electrode
On the origin of the differences between stearic-acid-modified carbon paste electrode performances after exposure to surfactant and brain tissues (Petit et al.) 101
Superconductivity
Quantum mechanics: a breakthrough into biological system dynamics (Costato et al.) 27
Superoxide anions
Amperometric determination of superoxide anions generated from a single phagocyte with femto-ampere sensitivity (Tanaka et al.) 201
Superoxide ion
Chemiluminescence of a *Cypridina* luciferin analogue by electrogenerated superoxide ion (Okajima et al.) 205
Synchronous fluorescence spectroscopy
The effect of oxygen on the electrochemical behavior of myoglobin (Chou et al.) 217

Thiols
Voltammetric evidence of interfacial interactions between folates and thiols (Prokopová, Heyrovský) 209
Time dependence
Electroporation stimulates interleukin 10 production in human monocytic cell lines THP-1 and U937 (Lehmann et al.) 227
Topa quinone
Differential pulse polarographic study of the redox centres in pea amine oxidase (Šebela et al.) 173
Transmission functions
Topology of mutual relationships implicit in the Fröhlich model (Šrobár, Pokorný) 31
Tubulin polymerization
Cellular automata simulation of the effects induced by an external electromagnetic field on microtubule formation dynamics (Casati et al.) 63

Unstirred lagers
Dynamics of formation and dissipation of local pH gradients in the unstirred layers near bilayer lipid membranes (Dzekunov, Antonenko) 187
Urea
Electrochemical identification of intermediate forms of urea denaturation of horse heart cytochrome c (Zhu, Dong) 107
UVCD
Conformational study of some milk proteins. Comparison of the results of electronic circular dichroism and vibrational circular dichroism (Urbanová et al.) 77

Vibrational circular dichroism
Conformational study of some milk proteins. Comparison of the results of electronic circular dichroism and vibrational circular dichroism (Urbanová et al.) 77

Wave propagation
The geometric curvature of microtubules may play a part in information processing (Clark) 59
